Claims 1-42 (Canceled)

Claim 43 (currently amended) A method for attracting Aedes

aegypti, Aedes albopictus, and or Anopheles albinmanus comprising

exposing an environment with a composition comprising Aedes

aegypti, Aedes albopictus, and or Anopheles albinmanus attracting

amounts of lactic acid and butanone.

Claim 44. (Previously presented) The method of claim 43 wherein said composition further comprises dimethyl disulfide.

Claim 45 (currently amended) A Composition consisting of mosquito

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

attracting amounts of lactic acid, acetone, and carbon dioxide.

Claim 46. (currently amended) A composition consisting of mosquito <u>Aedes aegypti</u>, <u>Aedes albopictus</u>, <u>and or Anopheles</u> <u>albinmanus</u> attracting amounts of lactic acid and dimethyl disulfide.

Claim 47. (currently amended) A composition consisting of mosquito Aedes aegypti, Aedes albopictus, and or Anopheles

albinmanus attracting amounts of lactic acid, dimethyl disulfide, and carbon dioxide.

Claim 48. (currently amended) A composition consisting of mosquito Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus attracting amounts of glycolic acid and acetone.

Claim 49. (currently amended) A composition consisting of mosquito Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus attracting amounts of glycolic acid, carbon dioxide, and lactic acid.

Claim 50. (Canceled)

Claim 51. (currently amended) A method for attracting mosquitoes

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

consisting essentially of mosquito Aedes aegypti, Aedes

albopictus, and or Anopheles albinmanus attracting amounts of

lactic acid, butanone and dimethyl disulfide.

Claim 52. (currently amended) A method for attracting mosquitoes

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

of mosquito Aedes aegypti, Aedes albopictus, and or Anopheles

albinmanus attracting amounts of lactic acid, acetone, and carbon dioxide.

Claim 53 (currently amended) A method for attracting mosquitoes

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

comprising exposing an environment with a composition consisting

of mosquito Aedes aegypti, Aedes albopictus, and or Anopheles

albinmanus attracting amounts of lactic acid and dimethyl

disulfide.

Claim 54 (currently amended) A method for attracting mosquitoes

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

consisting of exposing an environment with a composition

consisting essentially of mosquito Aedes aegypti, Aedes

albopictus, and or Anopheles albinmanus attracting amounts of

lactic acid, dimethyl disulfide, and carbon dioxide.

Claim 55 (currently amended) A method for attracting mosquitoes

Aedes aegypti, Aedes albopictus, and or Anopheles albinmanus

comprising exposing an environment with a composition consisting

Anopheles albinmanus attracting amounts of glycolic acid, carbon dioxide, and lactic acid.
